## NCA Technology Reaching All Kids

**NCAtrak makes information sharing easy and effective for all members of your team.** Provides grant team members and MDT partner agencies access to information about cases and clients, with limits that you control. With role-based security and access, partners supervise and maintain only those cases assigned to their agency for their services.

**NCAtrak is easily modified to your specific needs.** Each NCAtrak subscriber can create customized lists of partner agencies and personnel for tracking case progress. NCAtrak can grow and change with your center's needs without losing data fidelity for past records.

**Write Your Own Reports.** NCAtrak offers a built in reporting tool that gives you complete reporting access to nearly every data field in the entire system. Write your own queries and reports to show the efficacy of your services, to demonstrate need to funders, or to provide evidence to a grantor that their support has made a difference.

**NCAtrak is effective and efficient.** As a web-based system, NCAtrak is easily accessible and an effective way to reduce your IT expenses. You won't need to buy specialized software, database servers, or expensive backup solutions to protect your case data.

**NCAtrak is affordable.** Subscription costs for NCA members to join NCAtrak are just **\$3,000 for the first year and \$2,000 for each subsequent year**, which includes all of the benefits listed above. At only \$8 per day, the advanced features of the software, training and the extensive technical support give you excellent value for your investment.
