

Day 1
10AM-4:30PM CST

Day 2
10AM-12:30PM CST

Implementing Trauma-Focused Cognitive Behavioral Therapy (TF-CBT) for Preschool and School-age Children with Problematic Sexual Behaviors (PSB) Related to Trauma

- ▲ This advanced TF-CBT training aims to increase and enhance participants' understanding of PSB in children 12 years and younger.
- ▲ The advanced TF-CBT training is comprised of pre-work, 1.5 days virtual training, and 6 monthly group consultation calls with relevant handouts and training materials. Training also includes a **senior leader webinar** and implementation group senior leader consultation call.
- ▲ The training and consultation will be conducted by a TF-CBT Trainer and a Problematic Sexual Behavior - Cognitive-Behavioral Therapy (PSB-CBT) Trainer.

Eligibility

- 1 - Attendees must be professionally licensed or license eligible.
- 2 - Successfully completed all aspects of TF-CBT training (i.e., web-based, in-person, consultation calls).
- 3 - Successfully completed three full TF-CBT cases using a standardized assessment measure to assess progress.
- 4 - Two of the three completed full TF-CBT cases must have actively involved caregivers.

All materials submitted will be reviewed and decisions about acceptance to the training will be made based on the required eligibility after review of your full application.
Completing the application does not guarantee acceptance to the training.

Questions: OU-YPSB@ouhsc.edu

Please note – This is an advanced TF-CBT training in which support is provided for addressing trauma-related PSB within TF-CBT treatment for children 12 and under and not training in a new and/or different treatment model. Furthermore, the treatment of PSB in the absence of trauma symptoms as well as youth over age 12 are not training objectives. This training is not designed to replace formal training in evidence-based treatment for PSB (e.g., PSB-CBT).
